-----------	---------------------------------

Full Stack Developer / PHP Developer - WordPress Developer

Lahore, Pakistan

Respect Sir/Mam I did work on a food ordering website at muqit.com. And also I created One-page Website with WordPress Elementor. Woocommerce and LMS Website created with WordPress. I have Experienced with custom themes and custom plugins.

Projects

Food Ordering (Add to cart)	Dec 2020 - Present (9 months)
-----------------------------	-------------------------------

Company: For Self

Tools: HTML, CSS, BOOTSTRAP, PHP, MYSQL, JAVASCRIPT, AJAX

The Online Ordering System can be defined as a simple and convenient way for customers to purchase food online, without having to go to the restaurant.

Customer selects and purchases the items he or she needs.

These items will then be delivered to the customer at his or her doorstep at the time they choose by a delivery person.

News Blogs Post Web site	Oct 2020 - Nov 2020 (1 month)
--------------------------	-------------------------------

Company: For Self

Tools: HTML, CSS, BOOTSTRAP, PHP, MYSQL

This is a simple blog posting news website which is developed in core PHP. There are two modules of this project Admin and User. Admin has different rights and Normal User has different. Normal Users can Only add a post. But Admin adds category add user delete a user or delete the post. All the Data on the front side is dynamically managed from the database.

ecommerce (Woocommerce)

Company: For Self

<https://www.fashion.sditcompany.com/>
